

Review: random, while  
assignment statements

Mr. Neat  
Java

# Lab

- Make 2, labeled, recycling Rectangles
- The dimensions of the Rectangles should be
  - width = 50
  - height = 100
- Randomly place the Rectangles on one of the “roads”
- only one Rectangle per “road”
- the Rectangle should stay between the lines (stay on the “road”)
